

PROJECT UPDATE

Greenwich Street Sewer Re-Lining Work

Overnight Work:

Sewer lining work will start on a portion of the existing sewer main on Greenwich Street. The re-lining work will occur on **Greenwich: Sansome to Battery**. Due to the scope of work, the re-lining work needs to be completed overnight. The work hours will be 4 PM until 1 AM. Work is anticipated Monday and Tuesday, January 18 and 19, 2021.

Impacts:

Residents may detect a faint nail polish-like odor from the lining process. This may be experienced by neighbors living near the manholes during insertion of the liner material into the sewer main. The chemical odor typically fades after a few minutes.

Impacts during this phase of work may include temporary street parking restrictions, dust, noise from generators and trucks, and focused project lighting while work is underway.

Overnight Work Hours:

Date: Monday, January 18, 2021

Time: 4:00 PM to 1:00 AM

Work: Cured-In-Place Liner

Location: Greenwich: Sansome to Battery (South Side)

Date: Tuesday, January 19, 2021

Time: 4:00 PM to 1:00 AM

Work: Cured-In-Place Liner

Location: Greenwich: Sansome to Battery (North Side)
